Audit of FY 2006 Financial Statements A07-01

November 2006

FEDERAL MARITIME COMMISSION

800 North Capitol Street, N.W. Washington, DC 20573

November 13, 2006

Office of Inspector General

Tel: (202) 523-5863 Fax: (202) 566-0043 E-mail: oig@fmc.gov

Chairman Blust;

I am pleased to transmit for your review the FY 2006 Audit of the Federal Maritime Commission's (FMC) Financial Statements. The audit was conducted by the public accounting firm of Clifton Gunderson LLP in conformity with auditing principles generally accepted in the United States of America.

The objective of the audit was to issue an opinion on whether the statements fairly present the financial position of the agency. This was the third consecutive year that the agency prepared financial statements for audit. As in the prior years, the agency once again received an unqualified opinion, the highest opinion given by independent auditors.

In its review of internal control over financial reporting, the auditor noted no matters involving the internal control and its operations that were considered material weakness as defined in OMB Bulletin No. 03-06, *Audit Requirements for Federal Financial Statements*. However, it did note certain matters involving internal control and its operations that have been reported to management in a separate letter, dated November 2, 2006, a copy of which is also attached.

I am available to discuss the statements or to answer any questions you may have.

Sincerely,

Adam R. Trzeciak Inspector General

cc: Director, Office of Administration (w/enclosures)
Deputy Director, Office of Administration (w/enclosures)
Director, Office of Financial Management (w/enclosures)

Federal Maritime Commission Washington, D.C.

We have completed the audit of the financial statements of the Federal Maritime Commission (FMC) as of September 30, 2006. In connection with our audit, we have issued our reports dated November 2, 2006. During the course of our audit, we also had the opportunity to observe the various accounting, operating and procedural matters as they related to FMC and its financial reporting department, the Administrative Resource Center (ARC) of the Department of Treasury Bureau of Public Debt, collectively referred to as FMC management. Based on our audit, we would like to make the following observations and suggestions.

1. Information Technology Security (Repeat)

Condition: Our review of controls related to the FMC included a review of third party reports issued as well as internal self-assessments to determine whether or not the internal control and other security weaknesses identified in these reviews were material enough to impact the fairness of presentation of FMC's Financial Statements at September 30, 2006. To fulfill this, we reviewed the following reports:

- FY06 SAS70 report for the Bureau of Public Debt issued by the KPMG LLP via the Office of the Inspector General;
- FY06 SAS70 report for the National Finance Center General Controls review operated by the United States Department of Agriculture (USDA); and
- FISMA self-assessment review done in conformity with the e-government act and submitted to the Office of Management & Budget.

Weaknesses relating to these reviews have been issued to FMC management by way of notification of findings and recommendations and Plan of Action and Milestones (POA&M).

Although management has addressed several issues previously reported and taken action to mitigate the identified risk, a few corrective actions are not complete as of the end of FY06.

Recommendation: FMC management should continue to follow-up with its service providers to address information security-related weaknesses identified in the aforementioned reports.

Centerpark I 4041 Powder Mill Road, Suite 410 Calverton, Maryland 20705-3106 tel: 301-931-2050 fax: 301-931-1710

2. Payroll Processing (repeat)

Condition: During our testing of internal control over payroll transaction processing we noted two instances where the balances of accrued annual and sick leave included on the employee's Leave and Earnings Statement did not agree to the STAR Time and Attendance records. These errors had previously been identified by the Commission's OFM staff and in a subsequent Audit of Payroll Processing Transactions conducted by the Commission's OIG. The differences were minor and management took immediate corrective action.

Recommendation: Management should further investigate the cause of these errors and take corrective action to avoid similar errors in the future. We also recommend that management ensure that periodic reconciliations of accrued leave balances be performed and that differences identified are corrected in a timely manner.

This letter is intended solely for the information and use of the management of FMC, the Bureau of Public Debt, the Government Accountability Office, OMB and Congress, and is not intended to be and should not be used by anyone other than these specified parties.

We are available to discuss the items contained in this letter at your convenience.

Independent Auditor's Report

To the Federal Maritime Commission

We have audited the accompanying balance sheets of the Federal Maritime Commission (FMC) as of September 30, 2006 and 2005, and the related statements of net cost, changes in net position, budgetary resources, financing, and custodial activity for the years then ended. These financial statements are the responsibility of FMC's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America; the standards applicable to the financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and Office of Management and Budget (OMB) Bulletin No. 06-03, *Audit Requirements for Federal Financial Statements*. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above, present fairly, in all material respects, the financial position of FMC as of September 30, 2006 and 2005 and its net cost; changes in net position; budgetary resources; reconciliation of net cost to budgetary obligations; and custodial activity for the years then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with Government Auditing Standards, we have also issued our reports dated November 2, 2006 on our consideration of FMC's internal control over financial reporting and on our tests of FMC's compliance with certain provisions of laws, regulations, contracts, grant agreements and other matters. The purpose of those reports is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not provide an opinion on the internal control over financial reporting or on compliance. Those reports are an integral part of our audit performed in accordance with Government Auditing Standards and should be considered in assessing the results of our audit.

Our audits were made for the purpose of forming an opinion on the basic financial statements taken as a whole. The Management's Discussion and Analysis is not a required part of the basic financial statements but is supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures to such information, which consisted principally of inquiries of FMC management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

Calverton, Maryland November 2, 2006

Clifton Genderson LLP

Independent Auditor's Report on Compliance and Other Matters

To the Federal Maritime Commission

We have audited the financial statements of the Federal Maritime Commission (FMC) as of, and for the year ended September 30, 2006, and have issued our report thereon dated November 2, 2006. We conducted our audit in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and Office of Management and Budget (OMB) Bulletin No. 06-03, *Audit Requirements for Federal Financial Statements*.

The management of FMC is responsible for complying with laws and regulations applicable to FMC. As part of obtaining reasonable assurance about whether FMC's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws and regulations, noncompliance with which could have a direct and material affect on the determination of financial statement amounts and certain other laws and regulations specified in OMB Bulletin No. 06-03, including the requirements referred to in the Federal Financial Management Improvement Act (FFMIA) of 1996. We limited our tests of compliance to these provisions and we did not test compliance with all laws and regulations applicable to FMC.

The results of our tests of compliance with laws and regulations described in the preceding paragraph, exclusive of FFMIA, disclosed no instances of noncompliance with laws and regulations and other matters that are required to be reported under *Government Auditing Standards* and OMB Bulletin No. 06-03.

Under FFMIA, we are required to report whether FMC's financial management systems substantially comply with the Federal financial management systems requirements, applicable Federal accounting standards, and the United States Government Standard General Ledger at the transaction level. To meet this requirement, we performed tests of compliance with FFMIA section 803(a) requirements. The results of our tests disclosed no instances in which FMC's financial management systems did not substantially comply with the three requirements discussed above.

Providing an opinion on compliance with certain provisions of laws and regulations was not an objective of our audit and, accordingly, we do not express such an opinion.

This report is intended solely for the information and use of the management of FMC, the Bureau of Public Debt, the Government Accountability Office, OMB and Congress, and is not intended to be and should not be used by anyone other than these specified parties.

November 2, 2006

Independent Auditor's Report on Internal Control

To the Federal Maritime Commission

We have audited the financial statements of the Federal Maritime Commission (FMC), as of and for the year ended September 30, 2006, and have issued our report thereon dated November 2, 2006. We conducted our audit in accordance with auditing standards generally accepted in the United States of America; the standards applicable to the financial audits contained in *Government Auditing Standards*; issued by the Comptroller General of the United States; and, Office of Management and Budget (OMB) Bulletin No. 06-03, *Audit Requirements for Federal Financial Statements*.

In planning and performing our audit, we considered FMC's internal control over financial reporting by obtaining an understanding of FMC's internal control, determined whether internal controls had been placed in operation, assessed control risk, and performed tests of controls in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements. We limited our internal control testing to those controls necessary to achieve the objectives described in OMB Bulletin No. 06-03. We did not test all internal controls relevant to operating objectives as broadly defined by the Federal Managers' Financial Integrity Act (31 U.S.C. 3512), such as those controls relevant to ensuring efficient operations. The objective of our audit was not to provide assurance on internal control. Consequently, we do not provide an opinion on internal control.

Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be reportable conditions. Under standards issued by the American Institute of Certified Public Accountants, reportable conditions are matters coming to our attention relating to significant deficiencies in the design or operation of the internal control that, in our judgment, could adversely affect FMC's ability to record, process, summarize, and report financial data consistent with the assertions by management in the financial statements. Material weaknesses are reportable conditions in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements caused by error or fraud in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Because of inherent limitations in internal controls, misstatements, losses, or noncompliance may nevertheless occur and not be detected. We noted no matters involving the internal control and its operation that we consider to be material weaknesses. We noted other matters involving internal control and its operation that we have reported in a separate letter dated November 2, 2006.

Finally, with respect to internal controls related to performance measures reported in FMC's Management's Discussion and Analysis, we obtained an understanding of the design of significant internal controls relating to the existence and completeness assertions, as required by OMB Bulletin No. 06-03. Our procedures were not designed to provide assurance on internal control over reported performance measures, and, accordingly, we do not provide an opinion on such controls.

This report is intended solely for the information and use of the management of FMC, the Bureau of Public Debt, the Government Accountability Office, OMB and Congress, and is not intended to be and should not be used by anyone other than these specified parties.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Reporting Entity

FMC was established as an independent regulatory agency effective August 12, 1961. FMC is responsible for the regulation of ocean borne transportation in the foreign commerce of the United States (U.S.). The principle statutes or statutory provisions administered by the Commission are the Shipping Act of 1984, the Foreign Shipping Practices Act of 1988, and section 19 of the Merchant Marine Act of 1920, and sections 2 and 3 of Public Law No. 89-777. Most of these statutes were modified by the passage of the Ocean Shipping Reform Act of 1998, which took effect in 1999.

FMC monitors the activities of ocean common carriers, marine terminal operators, conferences, ports and ocean transportation intermediaries (OTIs) (non-vessel-operating common carriers and ocean freight forwarders) who operate in the foreign commerce of the U.S. and monitor these activities to ensure they maintain just and reasonable practices. FMC maintains a trade monitoring and enforcement program designed to detect and appropriately remedy malpractices and violations. FMC monitors the laws and practices of foreign governments which could be potentially restrictive and identifies and monitors carriers owned or controlled by foreign governments; processes and reviews agreements and service contracts for compliance with statutory requirements; and reviews common carriers' privately published tariff systems for accessibility and accuracy as required by the Ocean Shipping Reform Act of 1998. FMC also issues licenses to qualified OTIs in the U.S., ensures that all OTIs are bonded or maintain other evidence of financial responsibility, and ensures that passenger vessel operators demonstrate adequate financial responsibility for casualty and nonperformance.

FMC is composed of five Commissioners appointed for five-year terms by the President with the advice and consent of the Senate. The President designates one of the Commissioners to serve as Chairman, who is also the chief executive and administrative officer of FMC.

Congress enacts appropriations to permit FMC to incur obligations for authorized purposes. In fiscal years 2006 and 2005, FMC was accountable for General Fund appropriations. FMC recognizes budgetary resources as assets when cash (funds held by the U. S. Treasury) is made available through the Department of Treasury General Fund warrants.

General Funds are accounts used to record financial transactions arising under congressional appropriations or other authorizations to spend general revenues.

General Fund Miscellaneous Receipts are accounts established for receipts of non-recurring activity, such as fines, penalties, fees and other miscellaneous receipts for services and benefits.

FMC has rights and ownership of all assets reported in these financial statements. There are no non-entity assets.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

B. Basis of Presentation

The financial statements have been prepared to report the financial position, net cost of operations, changes in net position, status and availability of budgetary resources, and the reconciliation between proprietary and budgetary accounts of the FMC. The statements are a requirement of the Chief Financial Officers Act of 1990, the Government Management Reform Act of 1994, the Accountability of Tax Dollars Act of 2002 and the Office of Management and Budget (OMB) Circular A-136, Financial Reporting Requirements. They have been prepared from, and are fully supported by, the books and records of FMC in accordance with the hierarchy of accounting principles generally accepted in the United States of America, standards approved by the principals of the Federal Accounting Standards Advisory Board (FASAB), OMB Circular No. A-136, and FMC accounting policies which are summarized in this note. These statements, with the exception of the Statement of Budgetary Resources, are different from financial management reports, which are also prepared pursuant to OMB directives that are used to monitor and control FMC's use of budgetary resources.

The statements consist of the Balance Sheet, Statement of Net Cost, Statement of Changes in Net Position, Statement of Budgetary Resources, Statement of Financing, and the Statement of Custodial Activity. In accordance with OMB Circular A-136, the financial statements and associated notes are presented on a comparative basis.

C. Basis of Accounting

Transactions are recorded on both an accrual accounting basis and a budgetary basis. Under the accrual method, revenues are recognized when earned, and expenses are recognized when a liability is incurred, without regard to receipt or payment of cash. These financial statements were prepared following accrual accounting. Budgetary accounting facilitates compliance with legal requirements on the use of federal funds. Balances on these statements may therefore differ from those on financial reports prepared pursuant to other OMB directives that are primarily used to monitor and control FMC's use of budgetary resources.

D. Revenues & Other Financing Sources

Congress enacts annual appropriations to be used, within statutory limits, for operating, capital and grant expenditures. Additional amounts are obtained from service fees and reimbursements from other government entities and the public.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Appropriations are recognized as a financing source when expended. Revenues from service fees associated with reimbursable agreements are recognized concurrently with the accrued expenditures for performing the services. Appropriations expended for capitalized property and equipment are recognized as expenses when an asset is consumed in operations.

FMC recognizes as an imputed financing source the amount of accrued pension and postretirement benefit expenses for current employees paid on our behalf by the Office of Personnel Management (OPM).

There are no earned revenues in the fiscal years ended September 30, 2006 and 2005.

E. Taxes

FMC, as a federal entity, is not subject to Federal, State, or local income taxes, and, accordingly, no provision for income taxes has been recorded in the accompanying financial statements.

F. Fund Balance with Treasury

The U.S. Treasury processes cash receipts and disbursements. Funds held at the Treasury are available to pay agency liabilities. FMC does not maintain cash in commercial bank accounts or foreign currency balances.

G. Accounts Receivable

Accounts receivable consists of amounts owed to FMC by the general public and FMC employees. Accounts receivable in the Salaries and Expense Fund represents an employee related receivable. An allowance for uncollectible accounts receivable from the public is established when either (1) based upon a review of outstanding accounts and the failure of all collection efforts, management determines that collection is unlikely to occur considering the debtor's ability to pay, or (2) an account for which no allowance has been established is submitted to the Department of the Treasury for collection, which takes place when it becomes 180 days delinquent.

H. General Property, Plant and Equipment

FMC's property, plant and equipment is recorded at original acquisition cost and is depreciated using the straight-line method over the estimated useful life of the asset. Major alterations and renovations are capitalized, except wherein the tenant improvement allowance specified in lease agreement covers the costs of certain renovations. Maintenance and repair costs are charged to expense as incurred. FMC's capitalization threshold is \$25,000 for individual purchases.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Applicable standard governmental guidelines regulate the disposal and convertibility of agency property, plant and equipment. The useful life classification for capitalized equipment assets is 5 years.

I. Advances and Prepaid Charges

Advance payments are generally prohibited by law. There are some exceptions, such as reimbursable agreements, subscriptions and payments to contractors and employees in select circumstances. Payments made in advance of the receipt of goods and services are recorded as advances or prepaid charges at the time of prepayment and recognized as expenses when the related goods and services are received.

J. Liabilities

Liabilities covered by budgetary or other resources are those liabilities for which Congress has appropriated funds or funding is otherwise available to pay amounts due.

Liabilities not covered by budgetary or other resources represent amounts owed in excess of available Congressionally appropriated funds or other amounts. The liquidation of liabilities not covered by budgetary or other resources is dependent on future Congressional appropriations or other funding. Intragovernmental liabilities are claims against FMC by other federal agencies. Liabilities not covered by budgetary resources on the Balance Sheet are equivalent to amounts reported as Components Requiring or Generating Resources on the Statement of Financing. Additionally, the Government, acting in its sovereign capacity, can abrogate liabilities.

K. Accounts Payable

Accounts payable consists of amounts owed to other federal agencies and the public.

L. Annual, Sick and Other Leave

Annual leave is accrued as it is earned, and the accrual is reduced as leave is taken. The balance in the accrued leave account is adjusted to reflect current pay rates. Liabilities associated with other types of vested leave, including compensatory, restored leave, and sick leave in certain circumstances, are accrued at year-end, based on latest pay rates and unused hours of leave. Funding will be obtained from future financing sources to the extent that current or prior year appropriations are not available to fund annual and other types of vested leave earned but not taken. Nonvested leave is expensed when used. Any liability for unused sick leave by a Civil Service Retirement System (CSRS)-covered employee is transferred to the Office of Personnel Management upon the retirement of that individual. No credit is given for sick leave balances upon the retirement of Federal Employee's Retirement System (FERS)-covered employees.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

M. Accrued Workers' Compensation

A liability is recorded for actual and estimated future payments to be made for workers' compensation pursuant to the Federal Employees' Compensation Act (FECA). The actual costs incurred are reflected as a liability because FMC will reimburse the Department of Labor (DOL) two years after the actual payment of expenses. Future appropriations will be used for the reimbursement to DOL. The liability consists of (1) the net present value of estimated future payments calculated by the DOL, and (2) the unreimbursed cost paid by DOL for compensation to recipients under the FECA.

N. Retirement Plans

FMC employees participate in either the Civil Service Retirement System (CSRS) or the Federal Employees' Retirement System (FERS). FERS was established by the enactment of Public Law 99-335. Pursuant to this law, FERS and Social Security automatically cover most employees hired after December 31, 1983. Employees hired before January 1, 1984 elected to join either FERS and Social Security or remain in CSRS.

All employees are eligible to contribute to the Thrift Savings Plan (TSP). For those employees participating in the FERS, a TSP account is automatically established and FMC makes a mandatory one percent contribution to this account. In addition, FMC makes matching contributions, ranging from one to four percent, for FERS eligible employees who contribute to their TSP accounts. Matching contributions are not made to the TSP accounts established by CSRS employees. For FERS participants, FMC also remits the employer's share of the required contribution.

FERS employees and certain CSRS reinstatement employees are eligible to participate in the Social Security program after retirement.

FMC recognizes the imputed cost of pension and other retirement benefits during the employees' active years of service. OPM actuaries determine pension cost factors by calculating the value of pension benefits expected to be paid in the future and communicates these factors to FMC for current period expense reporting. OPM also provides information regarding the full cost of health and life insurance benefits. FMC recognized the offsetting revenue as imputed financing sources to the extent these expenses will be paid by OPM.

FMC does not report on its financial statements information pertaining to the retirement plans covering its employees. Reporting amounts such as plan assets, accumulated plan benefits, and related unfunded liabilities, if any, is the responsibility of the OPM.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

O. Use of Estimates

Management has made certain estimates when reporting assets, liabilities, revenue, and expenses, and in the note disclosures. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

P. Net Position

Net position is the residual difference between assets and liabilities and is comprised of unexpended appropriations and cumulative results of operations. Unexpended appropriations represent the amount of unobligated and unexpended budget authority. Unobligated balances are the amount of appropriations or other authority remaining after deducting the cumulative obligations from the amount available for obligation. The cumulative results of operations is the net result of FMC's operations since inception.

Q. Imputed Costs/Financing Sources

Federal Government entities often receive goods and services from other Federal Government entities without reimbursing the providing entity for all the related costs. In addition, Federal Government entities also incur costs that are paid in total or in part by other entities. An imputed financing source is recognized by the receiving entity for costs that are paid by other entities. FMC recognized imputed costs and financing sources in fiscal years 2006 and 2005 to the extent directed by OMB.

R. Contingencies

Liabilities are deemed contingent when the existence or amount of the liability cannot be determined with certainty pending the outcome of future events. FMC recognizes contingent liabilities, in the accompanying balance sheet and statement of net cost, when it is both probable and can be reasonably estimated. FMC discloses contingent liabilities in the notes to the financial statements when the conditions for liability recognition are not met or when a loss from the outcome of future events is more than remote. In some cases, once losses are certain, payments may be made from the Judgment Fund maintained by the U.S. Treasury rather than

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

from the amounts appropriated to FMC for agency operations. Payments from the Judgment Fund are recorded as an "Other Financing Source" when made. There are no contingencies that require disclosure.

S. Reclassifications

Statement of Budgetary Resources - The presentation used for the Statement of Budgetary Resources (SBR) prior to FY06 has been revised to reflect a new format required pursuant to the Office of Management and Budget (OMB) Circular A-136, *Financial Reporting Requirements*. Circular A-136 requires agencies to present both FY06 and FY05 SBR in the same format. Accordingly, certain reclassifications were made to the previously issued FY05 SBR to conform to the new format.

Other - Certain fiscal year 2005 balances have been reclassified, retitled, or combined with other financial statement line items for consistency with the current year presentation. Due to a change in the accrual process, certain balances in Other Accrued Liabilities for fiscal year 2005 have been reclassified to Accounts Payable for consistency with the current year presentation.

T. Expired Accounts and Cancelled Authority

Unless otherwise specified by law, annual authority expires for incurring new obligations at the beginning of the subsequent fiscal year. The account in which the annual authority is placed is called the expired account. For five fiscal years, the expired account is available for expenditure to liquidate valid obligations incurred during the unexpired period. Adjustments are allowed to increase or decrease valid obligations incurred during the unexpired period but not previously reported. At the end of the fifth expired year, the expired account is cancelled.

NOTE 2 - FUND BALANCE WITH TREASURY

Fund balance with Treasury as of September 30, 2006 and 2005 consisted of:

		2006	2005
Fund Balances:			\$
Appropriated Funds	<u>\$</u>	2,676,163	\$ 2,217,146
Status of Fund Balance with Treasury:			
Unobligated Balance			
Available	\$	4,636	\$ 1,302
Unavailable		122,101	179,554
Obligated Balance not yet Disbursed		2,549,426	2,036,290
Total	\$	2,676,163	\$ 2,217,146

NOTE 2 – FUND BALANCE WITH TREASURY (CONTINUED)

Restricted unobligated fund balances represent the amount of appropriations for which the period of availability for obligation has expired. These balances are available for upward adjustments of obligations incurred only during the period for which the appropriation was available for obligation or for paying claims attributable to the appropriations.

NOTE 3 – GENERAL PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment account balances as of September 30, 2006 and 2005 were as follows:

Description	Acquisition Cost	Accumulated Depreciation	Net Book Value
September 30, 2006 Office Equipment	<u>\$ 419,982</u>	\$ (389,629)	\$ 30,353
September 30, 2005 Office Equipment	<u>\$ 419,982</u>	<u>\$ (369,543</u>)	\$ 50,439

NOTE 4 – LIABILITIES

The accrued liabilities for FMC are comprised of program expense accruals, payroll accruals, and annual leave (funded and unfunded) earned by employees. Program expense accruals represent expenses that were incurred prior to year-end but were not paid. Similarly, payroll accruals represent payroll expenses that were incurred prior to year-end but were not paid.

	September 30		30	
		2006	8	2005
Intragovernmental:				
Accounts Payable & Other Accrued	\$	11,145	\$	10,130
Payroll Taxes Payable		102,709		82,970
Other Post-Employment Benefits		8,529		8,034
Unfunded FECA Liability		495		644
Custodial Liabilities		3,450		1,819
Total Intragovernmental		126,328		103,597
Accounts Payable	\$	273,774	\$	196,409
Payroll Accrual		816,238		677,525
Unfunded Annual Leave		1,061,614		970,557
Payroll Taxes Payable		11,305		10,396
Custodial Liabilities		(2,170)	_	<u>(935</u>)
Total Other Liabilities		2,160,761	-	1,853,952
Total Liabilities	\$	2,287,089	\$	1,957,549

NOTE 5 - LEASES

FMC occupies office space under six lease agreements that are accounted for as operating leases. The lease locations and terms are listed below:

LOCATION	TERM	LEASE EXPIRATION DATE
Jamaica, NY	9 months	12-31-2006
Jamaica, NY	5 years	1-01-2007
Hollywood, FL	2 years	8-31-2007
Seattle, WA	2 years	5-31-2008
Washington, DC	10 years	11-02-2012
San Pedro, CA	Indefinite	-

The lease amounts vary from year to year depending on the specific lease. The total operating lease expense for fiscal years 2006 and 2005 was \$2,820,287 and \$2,732,261, respectively. The schedule of future payments for the term of the leases is as follows:

Fiscal Year	Lease Payments
2007	\$ 2,751,173
2008	2,749,283
2009	2,770,460
2010	2,795,448
2011	2,821,193
Thereafter	3,085,408
Total Future Paymen	ts \$ 16,972,965

NOTE 6 – LIABILITIES NOT COVERED BY BUDGETARY RESOURCES

The liabilities on FMC's Balance Sheet as of September 30, 2006 and 2005, include liabilities not covered by budgetary resources, which are liabilities for which congressional action is needed before budgetary resources can be provided. Although future appropriations to fund these liabilities are likely and anticipated, it is not certain that appropriations will be enacted to fund these liabilities. Liabilities not covered by budgetary resources consist entirely of unfunded leave. Unfunded leave balances are \$1,061,614 and \$970,557 as of September 30, 2006 and 2005, respectively.

NOTE 7 – INTRAGOVERNMENTAL COSTS

Intragovernmental costs represent goods and services exchange transactions made between two reporting entities within the Federal government, and are in contrast to those with non-federal entitities (the public). Such costs are summarized as follows:

	5
Public Costs 2,962,391 2,922 Total Office of Administration Costs \$ 8,449,512 \$ 6,763 Office of Operations: Intragovernmental Costs \$ 1,145,281 \$ 1,779 Public Costs 5,987,523 5,573 Total Office of Operations Costs \$ 7,132,804 \$ 7,352 Formal Proceedings: 1,403 Intragovernmental Costs \$ 754,837 \$ 1,403 Public Costs 4,203,666 4,368 Total Formal Proceedings Costs \$ 4,958,503 \$ 5,771 Office of Inspector General: Intragovernmental Costs \$ 51,228 \$ 85

Total Office of EEO Costs <u>\$ 135,722</u> <u>\$ 90</u>	,712

FMC had no earned revenues.

NOTE 8 – IMPUTED FINANCING SOURCES

FMC recognizes as imputed financing the amount of accrued pension and post-retirement benefit expenses for current employees. The assets and liabilities associated with such benefits are the responsibility of the administering agency, the Office of Personnel Management (OPM). For the fiscal years ended September 30, 2006 and 2005, respectively, imputed financing from OPM were \$1,115,461 and \$1,164,332.

NOTE 9 – UNDELIVERED ORDERS AT THE END OF THE PERIOD

Beginning with FY06, the format of the Statement of Budgetary Resources has changed and the amount of undelivered orders at the end of the period is no longer required to be reported on the face of the statement. Statement of Federal Financial Accounting Standards No. 7, Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting, states that the amount of budgetary resources obligated for undelivered orders at the end of the period should be disclosed. For the years ended September 30, 2006 and 2005, undelivered orders amounted to \$1,326,478 and \$1,050,826, respectively.

NOTE 10 – BUDGETARY RESOURCE COMPARISONS TO THE BUDGET OF THE UNITED STATES GOVERNMENT

Statement of Federal Financial Accounting Standards No. 7, Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting, calls for explanations of material differences between amounts reported in the Statement of Budgetary Resources (SBR) and the actual balances published in the Budget of the United States Government (President's Budget). However, the President's Budget that will include FY06 actual budgetary execution information has not yet been published. The President's Budget is scheduled for publication in February 2007 and can be found at the OMB Web site: http://www.whitehouse.gov/omb. The 2007 Budget of the United States Government, with the Actual Column completed for 2005, has been reconciled, and there were no material differences.

NOTE 11 - CUSTODIAL ACTIVITY

FMC is an administrative agency collecting for another entity or the General Fund. As a collecting entity, FMC measures revenue based on cash collection and refunds. This revenue is reported as custodial activity on the "Statement of Custodial Activity". The type of cash collected is for fines, penalties and administrative fees. A small portion is for interest on the past due fines. Another part of the custodial activity is application for licenses issued to qualified ocean transportation intermediaries (OTI's) in the U.S., commission reviews, petitions, status changes and special permission fees.

This information is an integral part of the accompanying financial statements REQUIRED SUPPLEMENTARY INFORMATION

APPENDIX A - MANAGEMENT'S DISCUSSION AND ANALYSIS

FEDERAL MARITIME COMMISSION

MANAGEMENT'S DISCUSSION and ANALYSIS

Fiscal Year 2006

MANAGEMENT'S DISCUSSION & ANALYSIS

A MESSAGE FROM THE CHAIRMAN

It is my pleasure to present the Federal Maritime Commission's Management's Discussion and Analysis for FY 2006. This Management's Discussion and Analysis represents the dedication and achievement of the agency's 122 employees. Because of their efforts, the FMC continues to be held in high regard by the industry it oversees. We are committed to developing programs and processes that will enable us to meet the changing demands of an always-evolving industry. In doing so, we strive to increase performance efficiencies and the effectiveness of our workforce to both be responsive to changing business practices and to better serve the American public and our stakeholders.

As a transportation/trade regulatory agency, our Vision is to ensure fairness and efficiency in U.S. maritime commerce. Our mandate is to help remove impediments to fair competition – undue controls, influences or non-market barriers imposed by any nation, carrier, cargo owner or intermediary – which can adversely affect U.S. occanborne trade. Our regulatory system

allows for the necessary oversight with minimal disruption to the efficient flow of U.S. imports and exports, ensuring that fair competition exists in the ocean transportation industry while allowing the industry to conduct business as efficiently as possible.

I am pleased to report that the FMC continues to position its resources with greater precision and effectiveness in order to continue to achieve its mandate within budget resources. FMC thus has achieved nearly all of its performance goals. In FY 2006, the FMC broadened its efforts to implement the President's Management Agenda initiative to expand electronic government by improving the management of information through the more effective use of available technologies, by streamlining the delivery of services and information to regulated entities, other government agencies and the public, and by further automating agency systems and enhancing the use of agency databases to allow staff to discharge program responsibilities more effectively.

As the chief administrative officer of the agency, one of my responsibilities is to ensure that our resources are efficiently managed and effectively used. The FMC has evaluated its management controls and financial management system, as required by the Federal Managers' Financial Integrity Act, and I can certify, with reasonable assurance, that the Commission is in compliance with the provision of that Act. The FMC is proud of its FY 2006 accomplishments and looks forward to providing high-quality service to the American public in future years.

Sincerely,

Steven R. Blust

SturBest

Chairman, Federal Maritime Commission

MANAGEMENT'S DISCUSSION and ANALYSIS

Introduction

This Management's Discussion and Analysis represents the completion of the Federal Maritime Commission's program and financing management process for Fiscal Year 2006, which began with mission and program planning, continued with the formulation and justification of FMC's budget submission to the President and Congress, through budget execution, and ended with a report of our program performance and the use of resources. This report was prepared pursuant to the requirements of the Chief Financial Officers Act, as amended by the Reports Consolidation Act, and OMB Circular No-A136 (Revised), and covers the Commission's activities from October 1, 2005, through September 30, 2006.

Our Management's Discussion and Analysis, provides an overview of the FMC. It consists of nine sections: Introduction describes the agency, its mission and structure; Regulatory Responsibility describes its regulatory mandate; Future Challenges includes information about the changes in the maritime industry; Program Performance Overview reports on the FMC's success in achieving its strategic goals; President's Management Agenda describes activities related to the relevant initiatives; Financial Performance Overview discusses the FMC's financial position and audit results; Financial Statement Highlights gives an overview of the major financial statements; Improper Payments Information Act provides a breakdown of any improper payments made by the agency and efforts to collect improper disbursements; and Systems, Controls, and Legal Compliance discloses the FMC's compliance with certain legal and regulatory requirements.

About the FMC

The FMC is an independent transportation/trade regulatory agency which administers the Shipping Act of 1984 ("1984 Act" or "Shipping Act") as amended by the Ocean Shipping Reform Act of 1998 ("OSRA"); section 19 of the Merchant Marine Act, 1920 ("1920 Act"); the Foreign Shipping Practices Act of 1988 ("FSPA"); and Public Law ("P.L.") 89-777 (passenger vessel certification). The Commission: monitors the activities of ocean common carriers, marine terminal operators, conferences, ports and ocean transportation intermediaries (non - vessel operating common carriers and ocean freight forwarders) who operate in the U. S. foreign commerce to ensure they maintain just and reasonable practices; maintains a trade monitoring and enforcement program designed to assist regulated entities in achieving compliance and to detect and appropriately remedy malpractices and violations of the prohibited acts set forth in section 10 of the 1984 Act; monitors the laws and practices of foreign governments which could have a discriminatory or otherwise adverse impact on shipping conditions in U. S. trades, and imposes remedial action as appropriate pursuant to section 19 of the 1920 Act or FSPA; enforces special regulatory requirements applicable to carriers owned or controlled by foreign governments; processes and reviews agreements, service arrangements and service contracts pursuant to the 1984 Act for compliance with statutory requirements; and reviews common carriers' privately published tariff systems for accessibility and accuracy as required by OSRA. The Commission also issues licenses to qualified ocean transportation intermediaries in the U. S., ensures that all OTIs are bonded or maintain other evidence of financial responsibility, and ensures that passenger vessel operators demonstrate adequate financial responsibility in case of nonperformance or injury to passengers.

Organization

The FMC is composed of five Commissioners appointed for five-year terms by the President with the advice and consent of the Senate. No more than three members of the FMC may belong to the same political party. The President designates one of the Commissioners to serve as Chairman. The Chairman is the chief executive and administrative officer of the agency. The FMC's organizational units consist of: Offices of the Commissioners; Office of the General Counsel ("OGC"); Office of the Secretary ("OS"), including the Library and Office of Consumer Affairs and Dispute Resolution Services ("CADRS"); Office of Administrative Law Judges ("ALJ"); Office of Equal Employment Opportunity ("EEO"); Office of the Inspector General ("OIG"); Office of Operations ("OPS"), including the Bureaus of Certification and Licensing ("BCL"), Enforcement ("BOE"), and Trade Analysis ("BTA"); and Office of Administration ("OA"), including the Offices of Financial Management ("OFM"), Human Resources ("OHR"), Information Technology ("OIT"), and Management Services ("OMS"). The majority of FMC personnel are located in Washington, DC., with Area Representatives in New York, New Orleans, Los Angeles, Scattle, and South Florida.

In FY 2006, the FMC's appropriation totaled \$20,294,010 which funded 122 full-time-equivalent staff.

MANAGEMENT'S DISCUSSION and ANALYSIS

Regulatory Responsibility

The FMC's regulatory responsibilities include:

- Protecting shippers and carriers engaged in the foreign commerce of the U.S. from restrictive or unfair foreign laws, regulations, or business practices that harm U.S. shipping interests or ocean trade.
- Reviewing operational and pricing agreements among ocean common carriers and marine terminal operators ("MTOs"), to ensure that they do not have excessively anticompetitive effects.
- Reviewing and maintaining a system containing the service contracts between ocean common carriers and shippers, and service arrangements between non-vessel-operating common carriers ("NVOCCs") and shippers, and using this system to guard against anticompetitive practices and other unfair prohibited acts.
- Ensuring that common carriers' rates and charges are accessible to the shipping public in private, electronically accessible systems.
- Regulating rates, charges, and rules of government-owned or -controlled carriers to ensure that they are just and reasonable and are not unfairly undercutting private competitors.
- Issuing passenger vessel certificates evidencing financial responsibility of vessel owners or charters to pay judgments for personal injury or death or to repay fares for the nonperformance of a voyage or cruise.
- Licensing OTIs to protect the public from unqualified, insolvent, or dishonest companies.
- Ensuring that OTIs maintain sufficient financial responsibility to protect the shipping public from financial loss.
- Investigating discriminatory rates, charges, classifications, and practices of common carriers, MTOs, and OTIs operating in the foreign commerce of the U.S.

The FMC is authorized by the FSPA, section 19 of the 1920 Act, and section 13(b)(6) of the 1984 Act, to take action to ensure that the foreign commerce of the U.S. is not burdened by non-market barriers to ocean shipping. The FMC may take countervailing action to correct unfavorable shipping conditions in U.S. foreign commerce and may impose penalties. The FMC may address actions by carriers or foreign governments that adversely affect shipping in the U.S. foreign oceanborne trades including the intermodal operations of carriers or the operations of OTIs, or that impair access of U.S.-flag vessels to ocean trade between foreign ports.

The 1984 Act is applicable to the operations of common carriers and other persons engaged in U.S. foreign commerce. It exempts agreements that have become effective under the 1984 Act from the U.S. antitrust laws, as contained in the Sherman and Clayton Acts. The FMC reviews and evaluates agreements to ensure that they do not exploit the grant of antitrust immunity, and to ensure that agreements do not otherwise violate the 1984 Act or result in an unreasonable increase in transportation cost or unreasonable reduction in service.

Regulatory Responsibility (continued)

In addition to monitoring relationships among carriers, the FMC is also responsible for ensuring that individual carriers, as well as those permitted by agreement to act in concert, fairly treat shippers and other members of the shipping public, in accordance with the 1984 Act's prohibition against undue discrimination. The 1984 Act also requires all carriers to make their rates, charges and practices available in automated tariff systems that must be available electronically to the public. NVOCCs may assess the rates and charges published in their tariffs or may offer service arrangements with shipping customers. Ocean common carriers are permitted to enter into service contracts with their shipper customers. Such contracts are filed electronically with the FMC in our Internet-based system, and are provided confidential treatment by the FMC as required by the Act. The FMC does not have the authority to approve or disapprove general rate increases ("GRIs") or individual commodity rate levels in the U.S. foreign commerce, except with regard to certain foreign government-owned or -controlled carriers.

P. L. 89-777 requires the operators of passenger vessels with 50 or more berths who embark passengers at U.S. ports to establish financial coverage to indemnify passengers in cases of death, injury, or nonperformance of transportation. The FMC certifies such operators upon the submission of satisfactory evidence of financial responsibility. The FMC ensures that all OTIs operating in the foreign commerce of the U.S. have established sufficient financial responsibility to protect shippers from financial loss. Additionally, the FMC licenses all U.S. OTIs.

The FMC carries out its regulatory responsibilities by conducting informal and formal investigations. It holds hearings, considers evidence and renders decisions, and issues appropriate orders and implementing regulations. The FMC also adjudicates and mediates disputes involving the regulated community, the general shipping public, and other affected individuals or interest groups.

The FMC also carries out a management and support function for information technology, financial management, human resources, and administrative support.

The FMC oversees approximately 5,400 regulated persons (passenger vessel operators, conferences, OTIs, NVOCCs, etc.).

The FMC has a new, improved, easy-to-navigate website which contains more information concerning the agency's activities and responsibilities. Please visit us at www.fmc.gov.

Future Challenges

International trade remains dependent upon an efficient ocean transportation system. The ocean shipping industry continues to face significant challenges related to port and maritime security, port congestion, industry consolidation and dynamic economic conditions. As the industry restructures to adapt to these changes, it is imperative for the FMC to ensure that its oversight produces a competitive trading environment in U.S. ocean commerce that is in harmony with, and responsive to, international shipping practices, and encourages fair and open commerce.

In response to industry changes, the Commission continues to review its regulatory initiatives to ensure that agency resources are utilized in a manner best suited to accomplish statutory obligations with a minimum of government intervention and regulatory cost. Similarly, we have implemented new internal business processes that are more responsive to the needs of the industry and other government agencies.

Cooperative working arrangements with front-line security agencies remain in place. Effective use of emerging information technologies continues to facilitate our efforts.

Program Performance Overview

The FMC, like other Federal agencies, provides an annual performance plan to Congress, pursuant to the Government Performance and Results Act ("GPRA"). The FMC has organized its performance goals to achieve its strategic goals. The FMC's FY 2003-FY 2008 Strategic Plan is available on the FMC's website. The complete FY 2006 Program Performance Report is contained in Chapter 2, Program Performance, in the Performance and Accountability Report. Briefly, in FY 2006, the Commission focused on refining the agency's business practices, specifically on revising and updating internal procedures in line with the amendment of Commission regulations. This includes facilitating the use and dissemination of filed material in order to improve analysis of required filings and responsiveness to inquiries, and implementation of procedural changes to enhance the effectiveness of agency operations. We broadened our efforts to implement the President's Management Agenda initiative to expand electronic government by improving the management of information through the more effective use of available technologies. We also streamlined the delivery of services and information to regulated entities, other government agencies and the public, and further automated agency systems and enhanced the use of agency databases to allow staff to discharge program responsibilities more effectively. Further, we simplified and refined the agency's performance appraisal system and developed a strategic succession plan for agency senior executives and non-SES upper level managers. Overall, we are pleased with the success we achieved in addressing our stated goals and objectives.

Achieving Strategic Goal Results

The FMC has a distinct process for measuring performance. Performance goals are developed to promote one of the FMC's strategic goals, and the processes or activities required to achieve the goals are identified. The agency then specifies the outcomes it believes will result from accomplishing each stated goal, and agrees on performance indicators as the quantifiers of performance. Finally, performance measures are established for evaluation of achievement of performance goals. Taken together, performance goals under each strategic goal are designed to enhance and further those goals each fiscal year, bringing the agency closer to its ideal of full achievement of its strategic goals.

President's Management Agenda

The President's Management Agenda is intended to make Government more citizen-centered, results-oriented, and market-based. The five initiatives are: 1) Strategic Management of Human Capital; 2) Competitive Sourcing; 3) Improved Financial Management, 4) Expanded E-Government, and 5) Budget and Performance Integration. The FMC has achieved some successes in its agenda to address these initiatives. *Chapter 2, Program Performance*, in the Performance and Accountability Report discusses our activities in these important areas in more detail.

A brief overview of the agency's successes includes the following.

Strategic Management of Human Capital – The FMC focused heavily on succession planning during FY 2006. We reviewed our performance appraisal system, implemented an SES Candidate Development Program and an Emerging Leaders Program, and initiated a pilot Individual Development Plan Program.

Budget and Performance Integration – The Strategic Plan and Annual Performance Plan continue to represent the fundamental framework for the agency's planning and budgeting activities. Funding and FTE levels are integrated into the agency's performance planning document by strategic goal, to identify clearly the budgetary and staff resources that are committed to each goal.

President's Management Agenda (continued)

Competitive Sourcing - The FMC submitted its FY 2006 Federal Activities Inventory Reform Act Inventory to OMB in June 2006. The Inventory identified 79 of the agency's 126 FTEs as commercial activity FTEs. No challenges to its commercial inventories have ever been received.

Expanded Electronic Government - During the fiscal year, the FMC made a number of filings in significant docketed proceedings available on the agency's website, as well as a significant number of historical agency decisions. Further, the FMC's SERVCON system was upgraded. The FMC upgraded service and support for the agency's online Agreements Library, and also upgraded a number of internal databases to streamline and simplify agency operations during FY 2006.

Improved Financial Performance - The FMC received an unqualified opinion on its financial statements in FY 2006, for the third straight year. The FMC will continue to strive to achieve unqualified audit opinions.

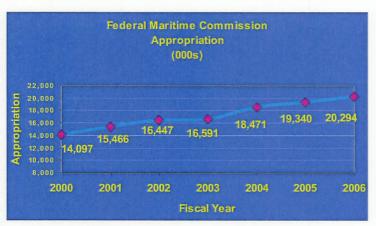

Financial Performance Overview

As of September 30, 2006, the financial condition of the FMC was sound with respect to having sufficient funds to meet program needs and adequate control of funds in place to ensure obligations did not exceed budget authority. The FMC's accounting services provider, the Bureau of the Public Debt ("BPD"), prepared the agency's financial statements in accordance with accounting standards codified in the Statements of Federal Financial Accounting Standards and the Office of Management and Budget Circular A-136, Financial Reporting Requirements (Revised 7/24/2006).

Sources of Funds

The FMC has a single source of funds, Salaries and Expenses, funded by an annual appropriation that is available for commitments and obligations incurred during the fiscal year in which the authority was granted. The FMC's total new budget authority for fiscal year 2006 was just over 20 million. This represents a net increase in budget authority over fiscal year 2005 of \$950,000 dollars. Although the FMC collects remittances for "user fees" and "fines and penalties," the agency is not authorized to offset any of its budget authority by utilizing these funds. The

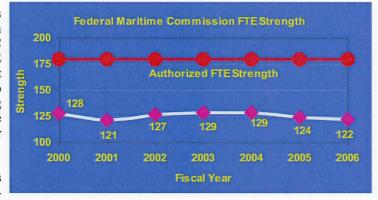

collections are deposited directly into the Treasury General Fund, and captured in the Statement of Custodial Activity which can be found in *Chapter 3, Auditors' Reports and Financial Statements*, in the Performance and Accountability Report.

Personnel Strength History

The FMC's actual FTE level has fluctuated slightly since 2000. After an initial decline in 2001, the FMC experienced modest growth in its FTE level through 2004, followed by a recent decline. The agency has endeavored to develop the appropriate mix of staffing and other available means to ensure the effective accomplishment of our mission.

In recent years, the Commission has been authorized a total of 180 full-time-

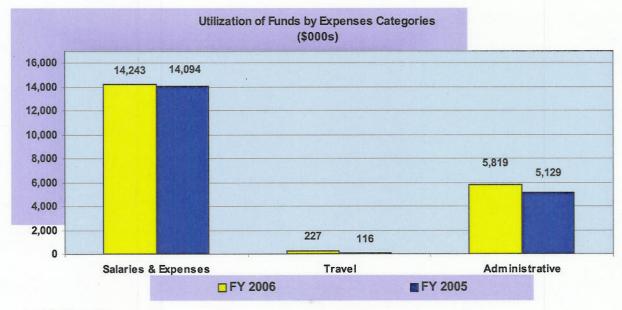

equivalent positions. Due to appropriation levels, the Commission has been required to maintain full-time personnel levels much lower than authorized.

Uses of Funds by Expense Category

In FY 2006, the FMC incurred new obligations of \$20.3 million, which was a \$905 thousand dollars increase over fiscal year 2004. Approximately 70% of the total appropriation was used for salaries and benefits. Of the remaining budget authority, 1% was used for Commission travel expenses and the remaining 29% was used for administrative expenses also known as operating expenses (e.g., rent, furniture, printing, maintenance). The unobligated authority balance of \$4,636 will remain active for four years to service FMC-established requirements.

Audit Results

The FMC received an unqualified opinion on its FY 2005 financial statements from the auditing firm of Clifton Gunderson LLP under contract through the FMC's Inspector General. For FY 2006, the FMC was again awarded an unqualified opinion on its financial statements. Comparative statements can be located in *Chapter 3, Auditors'* Reports and Financial Statements, in the Performance and Accountability Report.

Financial Statement Highlights

The financial statements have been prepared to report the financial position and results of operations of the entity, pursuant to the requirements of 31 U.S.C. 3515(b). While the statements have been prepared from the books and records of the entity in accordance with the formats prescribed by OMB, the statements are in addition to the financial reports used to monitor and control budgetary resources which are prepared from the same books and records. The statements should be read with the realization that they are for a component of the U.S. Government, a sovereign entity. One implication of this is that liabilities cannot be liquidated without legislation that provides resources to do so.

The FMC's financial statements summarize the financial position and financial activity of the agency. The financial statements, footnotes and the remainder of the required supplementary information appear in their entirety in *Chapter 3*, *Auditors' Report and Financial Statements*, in the Performance and Accountability Report. A brief analysis of the principal statements follows.

Analysis of the Balance Sheet

The FMC's assets in fiscal year 2006 were \$2,710,231 as of September 30, 2006. This represents an increase over fiscal year 2005 of \$440,625. The FMC's assets reported in the balance sheet are summarized in the accompanying table.

The Fund Balance with Treasury represents the FMC's largest asset of \$2,676,163 as of September 30, 2006. This is an increase of 20.7% over fiscal year 2005 and represents 98.7% of the agency's total assets. The Fund Balance with Treasury is comprised only of

Summary of Assets as of September 30, 2006			
	FY 2006	FY 2005 \$2,217,146	
Fund Balance with Treasury	\$2,676,163		
Accounts Receivable	\$2,961	\$2,021	
Capital Assets	\$30,353	\$50,439	
Other	\$754	\$0.00	
Total Assets	\$2,710,231	\$2,269,606	

annual appropriations maintained by the Department of the Treasury to address current liabilities.

Accounts Receivable as of September 30, 2006, was at \$2,961. This is a 46.5% increase over fiscal year 2005, and accounts for .001% of the FMC's total assets.

Capital Assets, also known as Property, Plant and Equipment, accounts for 1.2% of the FMC's total assets as of September 30, 2006. The "Net" value of \$30,353 accounts for the depreciation of all assets and represents the current book value of those assets.

The FMC's Liabilities totaled \$2,287,089 as of September 30, 2006. The accompanying table depicts an increase of \$329,540 total liabilities over fiscal year 2005. Accounts Payable represents the total goods and services received by the FMC as of September 30, 2006. The FMC is not in receipt of a billing from the various vendors as of the close of fiscal year 2006. Federal Employee Benefits represents accrued salaries and liabilities that are not funded by budgetary resources. These liabilities represent future workers'

Summary of Liabilities as of September 30, 2006			
	FY 2006	FY 2005	
Accounts Payable	\$275,054	\$197,294	
Payroll Taxes Payable	\$114,014	\$93,366	
Federal Employee Benefits	\$1,070,638	\$979,235	
Accrued Liabilities	\$827,383	\$687,654	
Total Liabilities	\$2,287,089	\$1,957,549	

compensation, and accrued annual leave that remains on the books. The Federal budget process does not recognize future benefits for today's employees, however, these liabilities will be recognized in future budget cycles as they are paid.

Net Position is the difference between total assets and total liabilities. The total net position for fiscal year 2006 is an increase of \$111,085 from fiscal year 2005. Unexpended Appropriations represents the total authority granted by Congress that the FMC has not expended as of September 30, 2006. Cumulative Results of Operations represents the net results of all operations of the FMC.

Net Position Summary as of September 30, 2006			
	FY 2006	FY 2005 \$1,231,683 (\$919,626)	
Unexpended Appropriations	\$1,453,216		
Cumulative Results of Operations	(\$1,030,074)		
Total Net Position	\$423,142	\$312,057	

The decrease in Cumulative Results is due mainly to the net decrease in Capital Assets as of September 30, 2006.

Analysis of the Statement of Net Cost

The analysis of Net Costs presents the net cost of FMC's five Commission Programs as identified in the FMC's Annual Report. The five agency programs are Formal Proceedings, Inspector General, Equal Employment Opportunity, Operations and Administration. The Statement of Net Costs shows the net cost of operations for the agency as a whole and its sub-organizations and/or programs. Net Costs compared to Budgetary Resources can be found in Chapter 3, Auditors' Report and Financial Statements, in the Performance and Accountability Report

Summary of the Net Cost as of Septo		
	FY 2006	FY 2005
Office of Administration	\$8,449,512	\$6,763,548
Office of Operations	\$7,132,804	\$7,352,269
Formal Proceedings	\$4,958,503	\$5,771,665
Office of Inspector General	\$469,885	\$433,223
Office of Equal Employment Opportunity	\$135,722	\$90,712
Net Cost of Program Services	\$21,146,426	\$20,411,417

Analysis of the Statement of Changes in Net Position

The Statement of Changes in Net Position, found on page nine, reports the change in the agency's net position during the reporting period. The statement is a summary of two factors, Unexpended Appropriations and Cumulative Results in Operations. The increase of \$111,085 from fiscal year 2005 to fiscal year 2006 is due principally to the net change in Cumulative Results of Operations due to further depreciation of Capital Assets and an increase in unexpended appropriations.

Analysis of the Statement of Budgetary Resources

The Statement of Budgetary Resources ("SBR") shows the source of the agency's budgetary resources and the status of those resources at the end of the reporting period. The statement also shows the relationship between budgetary resources and the status of the resources. The total budgetary resources must be equal to the status of budgetary resources at all times. A more detailed SBR can be found in *Chapter 3, Auditors' Report and Financial Statements*, in the Performance

Summary of the Statement as of September		Resources
	FY 2006	FY 2005
Total Budgetary Resources	\$20,473,727	\$19,622,729
Obligations Incurred	\$20,346,990	\$19,441,873
Unobligated Balance	\$126,737	\$180,856
Status of Budgetary Resources	\$20,473,727	\$19,622,729

and Accountability Report. For fiscal year 2006, the FMC had total budgetary resources available of \$20,473,727. This represents a 4.3% increase over fiscal year 2005 budgetary resources available of \$19,622,729. For fiscal year 2006, the SBR shows the FMC had incurred obligations of \$20,346,990, representing 99.4% of funding available, and had an unobligated balance of \$126,737.

Analysis of the Statement of Financing

The Statement of Financing is intended to provide a connection between accrual-based information (financial accounting) contained within the Statement of Net Cost and the obligation-based information (budgetary accounting) contained within the SBR. The Statement of Financing provides a reconciliation between the budgetary and proprietary accounting information within the financial system and ensures that they are in balance. Non-budgetary resources, costs not requiring resources, and financing sources yet to be provided are deducted from the budgetary obligations. This balance is then reconciled against the Net Cost of Operations.

Improper Payments Information Act

Narrative Summary of Implementation Efforts for FY 2006 and Agency Plans for FY 2006—FY 2009

- I. The Federal Maritime Commission has not identified any program that in and of itself constitutes a high-risk for improper payments. Therefore, the FMC considers all of its payments to fall within the realm of high-risk. As such, the FMC has instituted a separation of duties concerning payments that has been very successful in curtailing any improper payments. The National Finance Center ("NFC") became the agency's payroll provider in 2002 and is responsible for monitoring and reporting on any payroll-related payments. Any overpayments made to an FMC employee by the NFC on behalf of the FMC are offset by NFC. In FY 2006, the FMC had no overpayments. The FMC did not identify any improper collections through Intergovernmental Payments and Collections ("IPAC") collections.
- II. The FMC did not use a statistical sample to conduct its improper payment rate. The sample contains one hundred percent of all disbursements made by the FMC. This was the case for all programs.
- III. In order to reduce the rate of improper payments, the FMC will continue to monitor all payments to maintain a zero dollar improper payment figure. To this end, the FMC will ensure that there are sufficient segregation of duties pertaining to payments concomitantly with closer scrutiny of all IPAC collections made against the Commission. The FMC will continue to monitor all disbursements made on its behalf to ensure payments are valid and proper.
- IV. The table below represents the improper payments made by the FMC in FY 2006 with percentage forecasts through FY 2009.

Improper Payment Reduction Outlook FY 2006 - FY2009 (Millions)						
Program	FY06 Outlays	FY06 IP %	FY06 IP\$	FY07 %	FY08 %	FY09 %
Formal Proceedings	0.00	0.0000	0.0000	0.00	0.00	0.00
Inspector General	0.00	0.0000	0.0000	0.00	0.00	0.00
Equal Employment Opportunity	0.00	0.0000	0.0000	0.00	0.00	0.00
Operations	0.00	0.0000	0.0000	0.00	0.00	0.00
Administration	0.00	0.0000	0.0000	0.00	0.00	0.00
Totals	0.00	0.0000	0.0000	0.00	0.00	0.00

Improper Payments Information Act (continued)

V. The FMC has in place a segregation of duties to ensure that all invoices processed for payment are legitimate expenses of the agency. When an invoice is received it is first verified as a valid invoice belonging to the agency. The invoice is then processed by the OMS to identify the proper purchase order the payment is to be expensed against. The OFM then processes the invoice against the purchase order to ensure that there are sufficient funds available on the purchase order to make the payment. If there are insufficient funds remaining on the purchase order, a request is made to modify the purchase order to increase funding. Once the payment authorization has been processed, it is verified by a second member of the OFM. From there the payment request is forwarded to the BPD for processing. When the payment is loaded into the Oracle database, a final funds availability check is made by the financial system against the fund controls set for the FMC. Currently the fund controls are set to the summary appropriation level. Beginning 10/01/06, the original invoices are received by BPD and forwarded to OFM via electronic media. This effects another level of scrutiny for every invoice and subsequent payment disbursed by BPD on behalf of the FMC.

The receipt of an invalid IPAC collection must be processed as a payment for the reason that the funds have already been moved from the Treasury General Fund as a disbursement against the FMC's Agency Location Code ("ALC"). The internal controls in place remain unchanged, with a closer scrutiny paid to all invoices and subsequent payments.

- VI. The Chairman, as the Chief Administrative Officer of the FMC, is ultimately responsible for the efficient and effective utilization of the authority granted the agency by Congress. The Chairman has delegated financial responsibility to the Director, OFM. The Director of OFM has the responsibility to ensure that all disbursements made by BPD on behalf of the FMC are legitimate expenses of the agency and that there are sufficient funds available. The OFM is responsible for reducing and recovering improper payments, and keeps senior agency officials appraised of all relevant activities.
- VII. a. The FMC does not have an in-house information system to help reduce improper payments. The agency utilizes the infrastructure and financial system maintained in Parkersburg, WV by BPD.
 - b. In fiscal year 2006, the FMC requested funding to maintain the contract between the FMC and BPD for financial support and platform access to the Oracle database through Oracle's Discoverer portal.
- VIII. There are no statutory or regulatory barriers that limit the agency's ability to take corrective actions to address any improper payments.
- IX. The current IPAC system does not allow an agency to refuse a collection against its ALC through the General Fund it deems improper. The end result is a requirement to make the payments during the accounting period in which the collection was made and reverse the collection at a later date. The ability to challenge the collection would reduce the number of improper collections made against the agency, therefore reducing the number of improper payments.

Systems, Controls, and Legal Compliance

This section provides information on FMC's compliance with the:

Federal Managers' Financial Integrity Act
Federal Financial Management Improvement Act
Prompt Payment Act
Debt Collection Improvement Act
Biennial Review of User Fees
Performance Measure Summary
Inspector General Act

Federal Managers' Financial Integrity Act

The Federal Managers' Financial Integrity Act ("FMFIA") requires that agencies establish controls that reasonably ensure that obligations and cost comply with applicable law; assets are safeguarded against waste, loss, unauthorized use, or misappropriation; and revenues and expenditures are properly recorded and accounted for. It requires the agency head to provide an assurance statement of the adequacy of management controls and conformance of financial systems with Government standards.

In his Message earlier in this document, the Chairman provided his annual assurance statement. This statement was based on various sources and included management knowledge gained from the daily operation of agency programs and reviews, discussions with senior managers who together comprise the agency's Senior Policy Group, audits of financial statements, annual performance plans, and Inspector General reports, among other sources. The Senior Policy Group is comprised of all SES-level senior executives, including the Director of Operations, the General Counsel, and the agency's Chief Financial Officer, among others. Additionally, the Chairman meets regularly with, and receives regular reports from, the FMC's Inspector General.

Management control deficiencies, when identified, are addressed at the highest management levels within the agency. For instance, corrective actions for significant deficiencies identified in the agency's information technology area are overseen directly by the agency's Chief Information Officer.

FY 2006 Integrity Act Results

The Chairman of the FMC determined that, as of September 30, 2006, the management controls of the FMC provide reasonable assurance that the objectives of the FMFIA are being met, and that the FMC, as a whole, is in compliance with section 2 of the FMFIA. The FMC's financial management systems also are in substantial compliance with the objectives of the FMFIA, and the Commission is in compliance with section 4 of the FMFIA.

During the fiscal year, the FMC mitigated two significant deficiencies (formerly called "material weaknesses" by OMB) which were first identified in a previous fiscal year. These significant deficiencies were in the information technology program.

FY 2005 Integrity Act Results (continued)

The first of the two significant deficiencies was the quality of certification and accreditation ("C&A") documents and security self-assessments. To mitigate the deficiency, the FMC hired an IT Security Officer who conducted a review of the agency's systems and developed updated C&A documents for them. Disaster recovery testing was accomplished, and infrastructure and security upgrades were implemented on the FMC Network.

The second of the two significant deficiencies was the lack of assurance that a contractor-operated system (SERVCON) was configured and operated under Federal security guidelines. The FMC terminated the contract to operate the system off-site, transferred management of SERVCON to FMC in-house staff, and rewrote the system's security and password features. Disaster recovery testing was then accomplished.

The FMC is pleased to report that these significant deficiencies were mitigated.

During FY 2006, as a result of the Inspector General's review of the agency's implementation of FISMA, a finding was made which the FMC is reporting as a significant deficiency: C&A documents developed for the FMC network and applications do not provide enough information to evaluate the threats, vulnerabilities, safeguards and risks associated with operating the systems in a production environment. The FMC plans to address this deficiency through an application of appropriate NIST standards and requirements while also taking into account the size of the agency and the systems involved when developing additional materials for the C&A documents. We anticipate that this significant deficiency will be mitigated during FY 2007.

The existence of a significant deficiency does not preclude a statement of overall compliance, as the deficiency is not sufficient to prevent reasonable assurance of overall compliance.

Federal Financial Management Improvement Act

The Federal Financial Management Improvement Act ("FFMIA") requires agencies to implement and maintain systems that comply substantially with: Federal financial management system requirements; applicable Federal accounting standards; and the standard general ledger at the transaction level. The Act requires the agency head to determine whether the agency's financial management systems comply with the FFMIA and to develop remediation plans for systems that do not comply.

FY 2006 Federal Financial Management Improvement Act Results

The Chairman of the FMC determined that, as of September 30, 2006, FMC's financial management systems were in substantial compliance with the FFMIA. In making his determination, the Chairman considered the results of audits conducted by outside auditors in successive fiscal years, in addition to Inspector General reports, among other resources.

Prompt Payment Act

The Prompt Payment Act requires agencies to make timely payments to vendors for supplies and services, to pay interest penalties when payments are made after the due date, and to take cash discounts when they are economically justified. In FY 2006, the FMC maintained a percentage of on-time payments at 92.8%. The interest payments of \$44.11 were primarily a result of new invoice processing procedures that were implemented mid-year. The FMC will continue to strive towards 100% on-time payments in future years. The FMC has maintained a 100% on-time electronic/credit-card payment to its vendors.

Debt Collection Improvement Act

The Debt Collection Improvement Act enhances the ability of the Government to service and collect debts. The Act centralized the collection of non-tax delinquent debt owed to the government. The collection of delinquent debts is conducted by the Financial Management Service through the Treasury Offset Program where the names and taxpayer identification numbers ("TIN") are matched against the TINs of recipients of government payments. The balance owed the government is deducted or offset from the payment to the entity to satisfy the debt. All Office of Personnel Management ("OPM") retirement, vendor, IRS refunds, Social Security Benefits, and some federal salary payments are being offset. Federal agencies are required to refer delinquent accounts in excess of 180 days to Treasury for collection. The goal of the FMC is to minimize the amount of delinquent debt owed to the agency.

Biennial Review of User Fees

The Chief Financial Officers Act requires agencies to conduct a biennial review of fees and other charges imposed by agencies, and to make revisions to cover program and administrative costs incurred. During FY 2005, the FMC published its revised fees subsequent to its biennial review. The fees are posted on the FMC's website. In FY 2007 the FMC will again conduct its biennial review.

Performance Measure Summary

The FMC does not have an in-house financial accounting system, and as a small agency does not receive a Performance Measure Summary from the Department of the Treasury. The agency receives accounting services from BPD located in Parkersburg, WV. The Commission verifies and reconciles all financial statements and reports prior to submission, and has remained in compliance with all reporting thresholds including FACTS I (Federal Agencies' Centralized Trial-Balance System) reporting, timely reporting, and reconciliation of any financial statement differences.

Inspector General Act

The FMC has a very good record in resolving and implementing open audit recommendations presented in its Inspector General reports. Section 5(b) of the Inspector General Act requires agencies to report on final actions taken on Inspector General audit recommendations. Information can be found in *Appendix C*, of the Performance and Accountability Report.

Briefly, during fiscal year 2006, the Inspector General completed the following audits/inspections:

Audit of FY 2005 Financial Statements
Audit of FY 2005 FISMA Compliance
IG Assessment of Management Challenges Facing the FMC
Audit of Data Accuracy in BOE's Tracking System
Audit of Payroll Processing Transactions
Audit of FY 2006 FISMA/Privacy Compliance

The Inspector General's reviews disclosed no instances of questioned costs nor were any recommendations made that funds be put to better use. The FMC has addressed a number of recommendations from these reviews, and it is anticipated that the ones which remain outstanding will be completed in FY 2007.

During FY 2006, the agency mitigated two significant deficiencies which had been identified in a previous fiscal year. The Inspector General, in his FY 2006 FISMA Review, identified one significant deficiency related to the agency information security program; it is anticipated that corrective action on that deficiency will be completed in FY 2007.
